LOUISIANA DEPARTMENT OF ENVIRONMENTAL QUALITY (LDEQ)
BUNGE NORTH AMERICA, INC / DESTREHAN GRAIN ELEVATOR
PROPOSED PART 70 AIR OPERATING PERMIT RENEWAL & MODIFICATION

The LDEQ, Office of Environmental Services, is accepting written comments on the proposed renewal and modification of the Part 70 air operating permit for Bunge North America, Inc., 12442 River Rd., Destrehan, La 70047 for the Destrehan Grain Elevator. The facility is located at 12442 River Rd., in Destrehan, St. Charles Parish.

The Destrehan Grain Elevator is an existing dry bulk grain storage and handling facility that is currently operating under Permit No. 2520-00048-V3 that was granted on October 13, 2011.

Bunge North America, Inc. (Bunge), requested in addition to renewal of its Destrehan Grain Elevator's Part 70 Operating Permit No. 2520-00048-V3, authorization to make the below listed changes:

1. Input into the permit the PM 2.5 emissions for each individual emission point as well as facility-wide;
2. Replace the dust system #12 baghouse and enclose two of the conveyors aspirated by dust system 12;
3. Install a new ship and barge loading dock and associated pollution control equipment, which includes enclosed loading conveyors equipped with eighteen (18) individual dust filters, Emission Points 25-14.1 (EQT 0095) through 25-14.18 (EQT0112), three ship/barge loading spouts equipped with filters, Emission Points 25-14.51 (EQT0113), 25-14.52 (EQT0014) and 25-14.53 (EQT0115), and ship/barge loading process fugitive emissions, Emission Point 25-14F (EQT0116);
4. Remove, when the new system is fully operational, the existing ship and barge loading dock and associated pollution control equipment, which includes DS1 Shipping Gallery Dust Hoods and Loaders, Emission Points 1-72 (EQT0001), DSIC Shipping Gallery Dust Hoods and Loaders, eight (8) Shipping Process Fugitive Emissions, Emission Points 25-76A (EQT0059) through 25-76H (EQT0066), and Emission Points 2-72 (EQT0002), BARGE SHIPPING SPOUT PROCESS FUGITIVE EMISSIONS, Emission Point 25-76H1 (EQT0074), and Barge Shipping Spout Filters A and B, Emission Points 25-76H1A (EQT 0080) and 25-76H1B (EQT0081);
5. Reflect the requirements of the latest revised and/or amended rules and regulations; and
6. Revise and update emissions using the latest approved calculations methods.

The modification will be implemented in two phases. The first includes authorization to construct the new ship and barge loading dock and associated pollution control equipment (as described in item 1 above, as well as implementation of the changes specified in items 1, 2, 3, 4, 5, and 6 listed above. The second is removal of the existing ship and barge loading systems and associated systems and equipment, as detailed in item 4 above, when the new ship and barge loading dock and associated pollution control equipment, as described in item 4 above, are built and fully operational.

Estimated emissions in tons per year below reflect the facility-wide emissions limits under each of the two phases:

| Pollutant | PHASE I | | | PHASE II | | | |
|-------------------|---------|-------|--------|-------------------|-------|--------|-------|
| | Before | After | Change | Before | After | Change | |

| CO | 5.52 | 5.52 | - | CO | 5.52 | 5.52 | - |
| VOC | 0.61 | 0.61 | - | VOC | 0.61 | 0.61 | - |

Contiguous Facilities Summary:

The Destrehan Grain Elevator and its adjacent Destrehan Oilseed Processing Plant are contiguous facilities and form a single major source under the Part 70 regulations. However, these two units do not form a single stationary source under the PSD program because their corresponding SIC codes do not have the same first two digits and the two facilities are not interdependent (less than 50% of the soybean handled by the Grain Elevator is used by the Oilseed Processing Plant) as specified in the PSD program.

The permitted and/or estimated emissions from each individual facility, as well as the combined total emissions from both facilities, in tons per year, are as follows:

| Facility/Unit | Phase | Emissions - TPY | | | | | | |
|--|----------|-------------------|------------------|-----------------|-----------------|--------------|---------------|---------------------|
| | | PM _{2.5} | PM ₁₀ | SO ₂ | NO _x | CO | VOC | TAPs |

| | PHASE II | 68.13 | 11.99 | 0.05 | 8.84 | 5.52 | 0.61 | - |

¹Includes 470.97 tons of emissions in VOC TAPs.
²Includes 2.33 tons of emissions in Non-VOC TAPs.

A working draft of the proposed permit was submitted to the facility representative and LDEQ Inspection Division for technical review. Any remarks received during the technical review will be addressed in the "Worksheet for Technical Review of Working Draft of Proposed Permit". All remarks received by LDEQ are included in the record that is available for public review.

Comments and requests for a public hearing or notification of the final decision can be submitted via personal delivery, U.S. mail, email, or fax. **Comments and requests for public hearings must be received by 4:30 pm CST, Thursday, September 4, 2014.** Delivery may be made to the drop-box at 602 N. 5th St., Baton Rouge, LA 70802. ORDINANCE NO. 14-7-8

An ordinance to amend the St. Charles Parish Code of Ordinances, Chapter 12, Libraries, Section 12-4, Library Board of Control, to revise the language regarding the making of appointments and the limiting of terms.

ARTICLE I
PURPOSE AND IDENTIFICATION

A. Purpose. The Purpose of this Agreement is to set forth the terms for administering the East LaBranche Shoreline Protection, hereinafter sometimes called the "Project", as more particularly described below.
B. Identification. For the purpose of administration, identification and record keeping, State Project Number PO-43 is assigned to this Project. This number will be used to identify all Project costs.
C. Project Monitor. For the purpose of this Agreement, David Williams or his designee or successor, will serve as the CPRA Project Monitor for this Project and will be the liaison between the CPRA Board and CPRA, and Sponsor.

ARTICLE II
PROJECT DESCRIPTION

Description and Location of Project: This project involves the continuation of rock shoreline protection project on the south shore of Lake Pontchartrain in St. Charles Parish. The project will consist of installing approximately 10,500 linear feet of rock dike at or near the +1.0 foot NAVD 88 contour on the existing shoreline. Construction access will be via flotation channels excavated to -6.0 feet NAVD 88. The CIAP Parish allocated funds will construct approximately 1,400 feet but would not address a critical area which is not protected will compromise the 1,400 ft. The CPRA CIAP allocation of \$2,000,000 would take the project to a logical point where the total investment would be protected against Lake Pontchartrain wave energy.

Project Justification: The shoreline erosion rate in the project area is approximately 9.5 feet per year and, given the performance of similar projects in the vicinity, the proposed project is anticipated to stop that shoreline erosion. The Lake Pontchartrain shoreline is susceptible to erosion because of the long fetch across the lake, the vulnerable shoreline configuration, and the highly unconsolidated sediment base. This chronic erosion has breached the lake shoreline in several locations, exposing fragile, highly organic marsh substrates to increased wave and tidal energy and resulting in large, shallow pond formation in the interior marsh. The existing shoreline protection projects, installed in 1987 and 1993, protect approximately 8,700 feet of the fragile shoreline. The proposed East and West LaBranche CIAP funded projects would extend the existing shoreline protection along the Lake Pontchartrain shoreline for the LaBranche wetlands, from Bayou LaBranche on the west to the Jefferson Parish line on the east.
